

Kitimat Modernization Project

Kitimat, BC

PROJECT OVERVIEW

KTC Industrial Projects completed three office / maintenance shop buildings totaling 21,000 square feet. The Kitimat Modernization Project will increase Rio Tinto Alcan's smelter's current production capacity by 48% to approximately 420,000 tonnes per year. The introduction of the latest evolution of AP technology will make the Kitimat facility one of the most modern smelters in the world, and among three of Rio Tinto Alcan's largest smelters.

CLIENT – IDL Projects / Rio Tinto Alcan
