PROJECT OVERVIEW

In 2010, Imperial Oil received regulatory approval to proceed with a \$2billion expansion of the Company's Cold Lake Operation. The expansion will bring on 40,000 barrels per day of bitumen production in a new area called Nabiye. KTC Industrial Projects is supplying and installing the Water Treatment Plant, Dry Chemical Building, Caustic & Acid Enclosure and the Co-Generation building. The Nabiye project is expected to start-up by year end 2014.
